Session Title: Medications (Preoperative, Postoperative, Intraoperative)
Session Date/Time: Sunday, April 7th at 3:50 PM EST
Location: Meeting Level 2, Room 257A
Presenter: Steven M. Silverstein, MD, FACS, ABO
- **Title: Characteristics of Cataract Surgery Patients Receiving Intracanalicular Dexamethasone Insert: An IRIS Registry Analysis of 50,000 Eyes**
Session Title: Medications (Preoperative, Postoperative, Intraoperative)
Session Date/Time: Sunday, April 7th at 4:15 PM EST
Location: Meeting Level 2, Room 257A
Presenter: Nandini Venkateswaran, MD, ABO

About Ocular Therapeutix, Inc.

Ocular Therapeutix, Inc. is a biopharmaceutical company committed to enhancing people's vision and quality of life through the development and commercialization of innovative therapies for wet age-related macular degeneration (wet AMD), diabetic retinopathy, and other diseases and conditions of the eye, including glaucoma. **AXPAXLI**™ (axitinib intravitreal implant, also known as OTX-TKI), Ocular's product candidate for retinal disease, is based on its **ELUTYX**™ proprietary bioresorbable hydrogel-based formulation technology. AXPAXLI is currently in the first of two planned pivotal Phase 3 trials for wet AMD, the SOL-1 trial, and a Phase 1 clinical trial for the treatment of non-proliferative diabetic retinopathy. The clinical portfolio also includes **PAXTRAVA**™ (travoprost intracameral implant, also known as OTX-TIC), currently in a Phase 2 clinical trial for the treatment of primary open-angle glaucoma or ocular hypertension.

Ocular's expertise in the formulation, development and commercialization of innovative therapies and the ELUTYX platform supported the development and launch of its first commercial drug product, **DEXTENZA**®, an FDA-approved corticosteroid for the treatment of ocular inflammation and pain following ophthalmic surgery and ocular itching associated with allergic conjunctivitis. ELUTYX is also the foundation for two other clinical-stage assets, **OTX-CSI** (cyclosporine intracanalicular insert) for the chronic treatment of dry eye disease and **OTX-DED** (dexamethasone intracanalicular insert) for the short-term treatment of the signs and symptoms of dry eye disease, as well as several preclinical programs.

DEXTENZA® is a registered trademark of Ocular Therapeutix, Inc. AXPAXLI™, PAXTRAVA™, and ELUTYX™ and Ocular Therapeutix™ are trademarks of Ocular Therapeutix, Inc.

About DEXTENZA

DEXTENZA is FDA-approved for the treatment of ocular inflammation and pain following ophthalmic surgery and ocular itching associated with allergic conjunctivitis. DEXTENZA is a corticosteroid intracanalicular insert placed in the punctum, a natural opening in the inner portion of the lower eyelid, and into the canaliculus, and is designed to deliver dexamethasone to the ocular surface for up to 30 days without preservatives. DEXTENZA resorbs and exits the nasolacrimal system without the need for removal.

Please see full Prescribing and Safety Information at the DEXTENZA website.
